Ben Hyman

bch2857@rit.edu | 17 Lincoln Road North, Plainview, NY 11803 | 516-434-9857

EDUCATION

ROCHESTER INSTITUTE OF TECHNOLOGY

Bachelors of Science, Computer Engineering with Microelectronics Engineering Minor
GPA: 3.93
Graduation: Expected May 2024

AVAILABILITY

January - August 2023

COURSEWORK

Real Time & Embedded Systems
Interface and Digital Electronics
Digital Signal Processing
Digital System Design I/II
Applied Programming in C
Computer Architecture
Computer Organization
Assembly & Embedded Programming
Digital Electronics
Intro. to Semiconductor Devices

SKILLS

PROGRAMMING

VHDL
C / C++
ARM Assembly
Python
LaTeX

SOFTWARE TOOLS

Altium Designer
Orcad
Xilinx Vivado
Altera Quartus II / ModelSim
LTSPICE
GitHub
Keil
VSCode

HARDWARE

Oscilloscope
Waveform Generator
Multimeter
Power Supply
Arduino / Teensy
Soldering Iron
Raspberry Pi

EXPERIENCE

HARDWARE ENGINEERING CO-OP

D3 Engineering
January 2022 - August 2022 | West Henrietta, NY

- Performed high speed schematic and layout hardware design for multiple customer projects using Altium and Orcad.
- Participated in design reviews to identify potential problems and improvements in designs.
- Assisted in debugging and failure analysis of malfunctioning boards.

SOFTWARE ENGINEERING INTERN

Volvo Group
May 2021 - August 2021 | Hagerstown, MD

- Performed testing and verification on new release candidates for multiple different engine softwares.
- Designed and created new tests and hardware to support more sensors and actuators.
- Discovered a calibration issue in the newest engine software and helped take steps to resolve it.

PROJECTS

NIXIE TUBE CLOCK

February 2021 - Present

- From scratch, designed and built a clock that displays the time using eight IN14 nixie tubes.
- Used KiCAD to design a PCB to mount and connect all components.
- Designed a v2 of the PCB using Altium that features improvements and bug fixes over the original.

MIPS MICROPROCESSOR

January 2021 - May 2021

- Created a pipelined MIPS microprocessor using VHDL as a part of Digital Systems Design II.
- Designed and synthesized each component, such as the ALU, Register File, Memory, and Control Unit.

ORGANIZATIONS

RIT LAUNCH INITIATIVE

Avionics Lead | June 2022 - Present
August 2021 - Present | Rochester, NY

- Designed a custom PCB to wirelessly activate a rocket video subsystem that functioned as expected during flight in the 2022 Spaceport America Cup.
- Currently working on a modular backplane-style flight computer for the 2023 Spaceport America Cup

ENGINEERING HOUSE

August 2019 - Present | Rochester, NY

- As an upperclassman, supported freshmen and helped them with whatever problems they may have, school-related or otherwise.

POBOTS FIRST ROBOTICS TEAM

September 2015 - June 2019 | Plainview, NY

- Head of the electrical team which designed and maintained the electrical systems of the robot.
